Transferable Iqama | Available for Immediate Joining | Shift Work Ready

PROFESSIONAL SUMMARY

Results-driven IT Systems Administrator and System Engineer with 6+ years of progressive experience delivering enterprise-grade system administration, IT service management (ITSM), and end-user support across multi-site and multi-branch environments. Demonstrated expertise in Microsoft Active Directory, Windows Server, Microsoft 365 / Exchange Online, Microsoft Intune (MDM), SCCM / ConfigMgr, Citrix Workspace, VMware virtualisation (including VCF components), and LAN/WAN networking. Proficient in PowerShell scripting for automation and management tasks, with hands-on experience in backup and disaster recovery solutions. Skilled in managing 24/7 service desk operations with a focus on SLA compliance, first-call resolution (FCR), ITIL-aligned incident, problem, and change management practices, and closing VA/CR findings. Experienced in supporting engineering and design software such as Autodesk Revit, AutoCAD, and Trimble, alongside CCTV and PBX systems. Strong analytical and problem-solving abilities with excellent communication and documentation skills. CCNA-certified professional with a transferable Iqama, currently based in Riyadh, available for immediate deployment, and comfortable with shift-based schedules.

CORE TECHNICAL COMPETENCIES

Operating Systems	Windows Server 2012/2016/2019/2022, Windows 10/11, Linux (basic), macOS	Active Directory & IAM	AD DS, Group Policy (GPO), OU Management, RBAC, User & Group Administration
Microsoft 365 / MS Office	Microsoft Office (Word, Excel, PowerPoint), Exchange Online, Outlook, Teams, SharePoint, OneDrive, Azure AD, Entra ID, Citrix Workspace	Endpoint Management	Microsoft Intune (MDM/MAM), SCCM / ConfigMgr, Patch Management, Autopilot
Virtualisation	VMware ESXi, vSphere, vCenter, VCF (VMware Cloud Foundation), Hyper-V, Snapshots & VM Lifecycle	Networking	LAN/WAN, TCP/IP, DHCP, DNS, VPN, Cisco Switches/Routers, Wi-Fi, VLANs
ITSM / ITIL	Incident, Problem & Change Management, SLA Compliance, Service Desk Operations, ITIL v4 principles	Remote Support Tools	RDP, AnyDesk, VNC, UltraViewer, Ammy Admin, TeamViewer
Security & Compliance	Antivirus Software, Endpoint Protection, MFA, BitLocker, Security Baselines, Compliance Policies, VA/CR Closure, Vulnerability Remediation	Engineering Software	Autodesk Revit, AutoCAD, Trimble — installation, configuration & troubleshooting
Physical / AV Systems	CCTV (IP Cameras, DVR/NVR), Structured Cabling, PoE Switches, PBX & Telephone Systems, IP Telephony (SIP)	Automation & IoT	KNX Lighting Control, Smart Home Integration, UCM Modules, IoT Device Management
Scripting & Automation	PowerShell, Batch Scripting, Task Automation, Scheduled Jobs, Log Analysis	Backup & Disaster Recovery	Backup Solutions, Data Recovery, System Restore, Business Continuity, DR Planning
IT Asset & License Management	Software Licenses, IT Asset Records, User Access, Hardware Inventory, License Compliance	Soft Skills	Communication Skills, Problem Solving, Documentation & Reporting, Teamwork, Work Under Supervision, Handle Multiple Requests
Hardware Support	Desktops, Laptops, Printers, Scanners, POS Systems, Peripherals, UPS		

PROFESSIONAL EXPERIENCE

IT Operations Administrator

Jan 2025 — Present

Arak - Riyadh, KSA

- Designed, deployed, and configured end-to-end smart-home and enterprise IT infrastructure, encompassing Wi-Fi access points, PoE switches, IP telephony, and structured cabling.
- Programmed and integrated KNX lighting-control systems, smart locks, intercoms, UCM gateway modules, and touchscreen control panels, delivering a fully automated building management solution.
- Installed, configured, and maintained a multi-camera CCTV system (IP cameras, DVR/NVR, UPS, monitors, and storage), ensuring 24/7 physical security coverage.
- Administered LAN/WAN networks and VPN tunnels; diagnosed and resolved Layer 2/3 connectivity issues to maintain 99%+ uptime.
- Delivered remote technical support via AnyDesk, Ammy Admin, VNC, and UltraViewer; conducted user-facing walkthroughs when direct access was unavailable.
- Executed software installations, OS updates, system rollbacks, and scheduled preventive-maintenance tasks to sustain system health and performance.

HIKAE IT Pvt Ltd — India

- Led a 24/7 Service Desk team on rotational shifts supporting 42+ branch locations; managed full ticket lifecycle including logging, prioritisation, escalation, SLA monitoring, and resolution to achieve >95% first-call-resolution rate.
- Administered Microsoft Active Directory (AD DS), Exchange Server, Citrix Workspace, and Microsoft 365 — managing user accounts, distribution groups, shared mailboxes, permissions, and Group Policy Objects (GPOs).
- Deployed, configured, and enforced MDM/MAM policies via Microsoft Intune and SCCM / ConfigMgr, ensuring enterprise-wide endpoint compliance and security baseline adherence.
- Supported multi-site IT infrastructure including desktops, POS terminals, network printers, scanners, and CCTV systems across 42+ locations, minimising mean-time-to-repair (MTTR).
- Maintained VMware ESXi / vSphere / VCF environments — provisioning VMs, managing snapshots, and ensuring high availability (HA) for production workloads.
- Troubleshoot LAN/WAN, DHCP, DNS, and domain-join issues, reducing recurring network incidents through root-cause analysis aligned with ITIL Problem Management.
- Coordinated vendor relationships for hardware procurement, warranty claims, and on-site installation, managing end-to-end asset lifecycle.
- Automated routine system tasks using PowerShell scripts — generating reports, managing user accounts, scheduling jobs, and streamlining repetitive administrative processes.
- Implemented backup and disaster recovery solutions, performing regular data backups, system restore testing, and maintaining business continuity documentation.
- Applied ITIL-aligned Incident and Change Management processes to reduce unplanned downtime and improve service continuity; closed VA/CR findings and ensured compliance with security audit requirements.

System Engineer (L1/L2 Support)

Apr 2019 — Apr 2021

Kommineni Infotech Pvt Ltd — India

- Provided L1 and L2 technical support for desktops, laptops, printers, monitors, and peripherals, maintaining high CSAT scores through clear, empathetic communication.
- Configured and maintained network printers and print servers; resolved spooler, driver, and connectivity issues to minimise print-related downtime.
- Performed remote software installations, patch deployments, OS rollbacks, and system restores using VNC, AnyDesk, Ammy Admin, and Windows Remote Desktop (RDP).
- Diagnosed and resolved DHCP, DNS, and Active Directory authentication issues, preventing domain-access outages and reducing escalations.
- Followed ITIL-based ticketing workflows for consistent incident logging, categorisation, and resolution documentation; produced detailed technical documentation and knowledge-base articles for team collaboration.
- Maintained a professional, customer-centric approach when handling technical concerns, contributing to improved end-user satisfaction metrics.
